

# Review Chapter 12 Volume

Name Key Period     

Find the volume of the following prisms.  $V = B \cdot h$

$$6 \cdot 20 \cdot 17 = \boxed{2040 \text{ cm}^3}$$

$$\frac{1}{2}(12)(16) \cdot (10) = \boxed{960}$$

$$\left(\frac{1}{2} \cdot 4\sqrt{3} \cdot 48\right)(9) = \boxed{864\sqrt{3} \text{ m}^3}$$

Find the volume of the following cylinders and cones. Leave answer in terms of  $\pi$ .

$V = \pi r^2 h$

$$\pi \cdot 13^2 \cdot 15.3 = \boxed{2585.7\pi \text{ m}^3}$$

$$\pi \cdot 6^2 \cdot 25 = \boxed{900\pi \text{ in}^3}$$

$\frac{1}{3}\pi r^2 h$

$$\frac{1}{3} \cdot \pi \cdot 11^2 \cdot 60 = \boxed{2420\pi \text{ m}^3}$$

$$\frac{1}{3} \cdot \pi \cdot 8^2 \cdot 15 = \boxed{320\pi \text{ in}^3}$$

Find the volume of the following pyramids.

$\frac{1}{3}Bh$

$$\frac{1}{3} \cdot 10^2 \cdot 12 = \boxed{400 \text{ ft}^3}$$

$$\frac{1}{3} \cdot (16 \cdot 12) \cdot 15 = \boxed{960}$$

$$\frac{1}{3} (72)(8) = \boxed{192 \text{ ft}^3}$$

Find the volume of the following solids.

$$12 \cdot 11 \cdot 9 = 1188$$

$$7 \cdot 7 \cdot 5 = 245$$

$$1188 + 245 = \boxed{1503 \text{ in}^3}$$

$$\frac{1}{3}(5^2\pi)(12) + 25\pi \cdot 20$$

$$100\pi + 500\pi = \boxed{600\pi \text{ cm}^3}$$

(1884)

$$(24)^3 + \frac{1}{3}(24^2) \cdot 13$$

$$13824 + 960 = \boxed{14784 \text{ m}^3}$$

$$V = \frac{4}{3}\pi r^3 \quad SA = 4\pi r^2$$

- 14) Find the volume and surface area of a sphere with a radius of 9 in.

$$V = \frac{4}{3}\pi \cdot 9^3 = 972\pi \approx 3054 \text{ in}^3 \quad SA = 4\pi \cdot 9^2 = 324\pi \approx 1017.9$$

- 15) Explain the difference between the surface area of a sphere and the volume of a sphere. Give a real life example of each.

SA = covering (leather covering)  
V = filling (amount of air to fill)

- 16) Mr. Bill took a 96 inch piece of wire and cut it into equal length, which were soldered at the ends to form the edges of a cube. What is the volume of that cube?

 edges = 12  $\frac{96}{12} = 8$   $8^3 = 512 \text{ in}^3$

- 17) Mrs. Claus is taking a art class. Her art project is to make an cone vase. If the vase has a volume of 157 inches cubed, and a diameter of 10 inches. What is the height to the nearest inch?

$\frac{1}{3}\pi r^2 h$    $\frac{1}{3}(25\pi)h = 157$   $h \approx 6 \text{ in}$

- 18) A crate 8 feet long, 6 feet wide, and 8 feet tall is used to ship boxes of office chairs. If the box for the office chair is 4 feet long, 3 feet wide, and 2 feet tall, then how many can be shipped in each crate?

16 boxes

$$8 \cdot 6 \cdot 8 = 384$$

$$4 \cdot 3 \cdot 2 = 24$$

$$\frac{384}{24}$$

- 19) Two similar cylinders have diameters with a ratio of 2 to 5. If the volume of the larger cylinder is  $187.5\pi \text{ in}^3$ , then what is the volume of the smaller cylinder?

ratio of similitude =  $\frac{2}{5}$  volume ratio =  $\frac{8}{125}$   $\frac{8}{125} = \frac{x}{187.5\pi}$   $x = 12\pi \text{ in}^3$

- 20) Two similar cubes have a ratio of 3 to 7. If the surface area of the smaller cube is  $18 \text{ in}^2$ , then what is the surface area of the larger cube?

ratio of sim =  $\frac{3}{7}$  SA ratio =  $\frac{9}{49}$   $\frac{9}{49} = \frac{18}{x}$   $x = 98 \text{ in}^2$

- 21) An oil tank is cylindrical in shape. The diameter is 100 feet and the height is 30 feet. If oil is drained at a rate of 6000 cubic feet per minute, then how many minutes will it take to drain the oil tank?

$$2500\pi \cdot 30 = 75000\pi = \frac{235619.449}{6000} \approx 39.3 \text{ min}$$

- 22) Incense can be made in the shape of a cone. The cones are 3 inches tall with a radius of 2 inches. The material for making the incense comes in rectangular prisms and must be ground down and reshaped to form the cones. If the prism is 6 inches long, 4 inches wide, and 8 inches tall, then how many cones can be made?

$$\frac{1}{3}(4\pi) \cdot 3 = 4\pi \approx 12.57$$

$$\frac{192}{12.57}$$

- 23) A square pyramid has a base edge that is 6 feet and a slant height of 5 feet. The pyramid is made of solid gold. If the pyramid is melted down, how many bars that are 1 foot long, .5 foot wide, and .5 foot tall can be from the pyramid?

15 cones

$$\frac{1}{3}(36)(5) = 48$$

$$1 \times .5 \times .5 = .25$$

$$\frac{48}{.25} = 192 \text{ bars}$$
